Re: Docket # OOP-1211-1/CP1

Dear Commissioner Henney:

24.02 '00 JUN 13 A9:58

Regarding genetic engineered agriculture (GEA), I'm requesting a moratorium be imposed. GEA is already demonstrating it's not safe. It is contaminating the organic sector with their genetic drift & our organic farmers are already sustaining economic loss through no fault of their own. I'm requesting that the agricultural biotechnology people & the related seed companies reimburse our organic farmers for their monetary loss.

In addition, GEA has already harmed the Monarch caterpillars. There are also other concerns such as insect immunity to the Bt toxin, inactivation of food enzymes that are vital for so many body functions (counterfeit freshness), unknown long-term additional health effects on humans & wildlife, additional damage to the ecosystem, the creation of new allergens & toxins, other dietary risks, & religious & moral concerns about genes from animals being used in the gene engineering process.

OOP-1211

C1088

We are having so many environmental problems & people are getting sick ^{**} & are dying due to man's

pollution. Yet the idiots at the USDA not only insist on polluting but their pollution is getting worse through the genetic engineered agriculture. What is their problem ?! Could it be avarice ? Of course, avarice is the problem !

I demand a moratorium be imposed on
(agriculture under USDA)*
GEA & that the commercial sector be turned into organic farming. Please stop the USDA from polluting the food supply.

Sincerely,

Gloria Estrada

*(agriculture under USDA)

**
I've noticed that commercial food (food grown under the USDA) gives me cancer & mental illness.

Moratorium on
genetically engineered
agriculture, please!
Stop USDA polluting their
agriculture or our food supply.

Commissioner Jane Henney
